

“How can you become economically,  
environmentally and socially responsible?”

### Take the Next Step.

Lawrence provide fully comprehensive and bespoke waste management services to all customers of all sizes.

Our customers can have peace of mind when it comes to deliveries, collections and exchanges. With regulated and responsible processing, we are committed to “zero-to-landfill” and maximising recycling.

Our transport and central services teams are based on-site for maximum efficiency, so feel free to contact us.

## Be Part of Birmingham's First Zero-to-Landfill Zone

### Benefits to your business

- Carbon Footprint Reduction
- Less Energy Used
- 'Zero-to-landfill'
- Potential Cost Savings
- Increase environmental credentials to achieve accreditation / certification such as ISO 14001 / ISO 18001

To arrange an appointment or for further information about the value of your current waste and recycling or becoming part of Birmingham's 'zero-to-landfill' zone, contact Lawrence Recycling & Waste Management.

Despite the introduction of separate recycling and general waste bins/containers by local councils, up to 80 per cent of general UK waste still consists of mixed recyclables.

Waste that has not been separated by businesses or households into separate bins ends up contaminated and has to go through a cleaning process, or will very commonly be sent directly to landfill.

# Be Part of Birmingham's First Zero-to-Landfill Zone

## When should you review your waste management?

With landfill tax rates set to rise imminently in 2012, now is the time for businesses to act by taking simple steps to implement increased recycling in the workplace.

Every organisation has a legal responsibility to dispose of their waste safely, ethically and with minimal impact to the environment, the Waste Regulations 2011 emphasise the importance of stating which level of the revised waste hierarchy you have implemented when transferring waste.

Lawrence Recycling & Waste Management have the expertise since 1984 to assist businesses in avoiding landfill tax costs to in turn offer long term costs savings, by managing various waste streams to ensure 'zero-to-landfill'. With the largest covered Mixed Recycling Facility (MRF) in Europe, you can rest assured we can handle all waste streams on all scales

With tailored waste management packages to suit the individual needs of each organisation, Lawrence's friendly and professional experts can implement a free site waste management audit and advise on all the best options to help other organisations echo this same 'zero-to-landfill' goal.

## Commercial & Industrial Containers

With varying waste types, we offer tailored solutions to recycle as much as possible in our commitment to "zero-to-landfill".

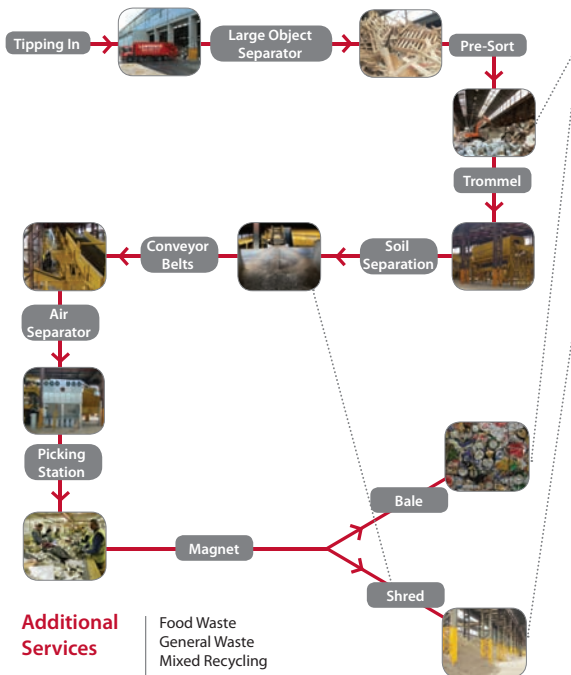

## Internal Systems

Lawrence can provide a variety of cost-effective containers, whatever your requirement and to maximise on recycling.

## The Lawrence Process

*"We'll take care of your waste worries..."*

Quality Recycled Soils & Aggregates  
Commodities Trading

## Commodities

*"Your valued waste, recycled through 'closed-loop-recycling'"*

## Quality Recycled Secondary Soils & Aggregates (Hardcore, Rubble)

Collection and delivery service to suit your construction / gardening project.

## How does 'zero-to-landfill' help our environment?

"Our 'zero-to-landfill' commitment means Lawrence's efficiently separates and processes all valuable waste streams such as card, plastic, glass and paper etc, in order to trade it as a commodity which is in turn reintroduced into the production cycle," advises Lawrence's Managing Director David Lawrence.

"Higher efficiency in waste management will increase your green credentials and environmental profile in achieving accreditations such as ISO 14001 and ISO 18001 as well as long term cost savings. Have you accounted for the forthcoming additional cost of higher landfill taxes? Have you considered a site audit and plan to minimise the risk of increased cost?"

Lawrence Recycling & Waste Management's experts are advising businesses about the National Waste Strategy and the increasing Government pressures regarding legislation.
